## AudioCodes 300HD

Series of High Definition IP Phones

**AudioCodes 300HD** Series of High Definition IP Phones offers a new dimension of voice call quality and clarity for the IP Telephony market. This new series of IP Phones further expands AudioCodes' VoIP product offering for the service providers' hosted services, Enterprise IP telephony and Enterprise contact centers markets. As a natural addition to the AudioCodes Media Gateway, Media Server & Multi-Service Business Gateway products, the AudioCodes 300HD Series of High Definition IP Phones enable Systems Integrators and end-customers to build end-to-end solutions that rely on AudioCodes' technological advantage and proven track record in providing state-of-the-art, high quality, and interoperable VoIP products.

The AudioCodes 300HD Series of High Definition IP Phones meet a growing demand for High Definition VoIP solutions in end-user phones and terminals, improving the productivity and efficiency of business communications with new quality standards set by the High Definition voice technology.

### Complete Range of Phones

The AudioCodes 300HD Series of High Definition IP Phones offers three phone models, which are well suited to the requirements of different types of business users. The 310HD is the 1-line, 2 concurrent calls per line entry level IP Phone and includes a basic display and user interface with multi language support. The 320HD is a 4-line, 2 concurrent calls per line premium model which includes a large Monochrome multi language graphic LCD display. The 350HD is a 6-line, 2 concurrent calls per line executive model with a large TFT color LCD display. All models support **HDVoIP**. The AudioCodes 300HD Series IP Phones are available with Power over Ethernet and/or external power supply.

### Cutting Edge Voice Quality & HD VoIP

Based on AudioCodes' advanced, robust and field-proven VoIPerfectHD™ software, AudioCodes' IP Phones are designed to utilize the most popular wideband coders such as G.722, G.722.2 (WB-AMR) and Microsoft Real Time Audio (RTA). Each of these phones features enhanced proprietary capabilities, such as packet loss concealment, high quality wideband acoustic echo canceler, and low-delay adaptive jitter buffers to enrich the HDVoIP experience.

### Interoperability

The AudioCodes 300HD Series of High Definition IP Phones is widely interoperable with IP-PBXs, Softswitches and IP Centrex Solutions. As Enterprises and Service Providers continue to seek open network architectures that enable them to maximize value and reduce costs, AudioCodes' best-of-breed technology, wide interoperability, and adherence to standards make the 300HD Series of High Definition IP Phones a natural selection.

### Mobility Enhancements

The AudioCodes 300HD series of High Definition IP Phones can be offered along with AudioCodes' VoIP Mobile Access Solution (VMAS) Clients for Smart Phones, Personal Computers and web. By using the combination of AudioCodes HDVoIP IP Phones and VMAS clients, customers can enjoy the enterprise telephony or hosted Centrex features from anywhere, inside or outside of the organization.
